

Life on Land			
SDG 15			
vegetation restoration	red list categories	soil bioremediation	bioremediation strategies
forest restoration	red list of threatened species	cane toads	forest certification
invasive plant species	conservation of nature	invasion success	pan paniscus
invasive pest	ecological restoration project	iucn red list of threatened species	bushmeat
natura 2000	forest management planning	gorilla gorilla	invasion dynamics
society for ecological restoration	river management	natura 2000 sites	iucn red list categories and criteria
vegetation recovery	invasive alien plants	conservation priorities	large carnivores
plant invasions	bird conservation	land restoration	melanoleuca
plant invasion	species invasion	species invasions	animal conservation
wetland restoration	reducing emissions from deforestation and forest degradation	revegetation	endangered animal
redd+	species at risk	giant panda (ailuropoda melanoleuca)	conservation assessment
invasive weed	non-native plants	endangered bird	conservation concern
forest recovery	panthera onca	ecosystem management	the red list
iucn red list	invasive weed optimization	environmental valuation	conifer plantation
river restoration	zebra mussels	prey interactions	grizzly bears
endangered plant	non-native species	soil and water conservation measure	trichechus manatus
extinction risk	marine strategy	linepithema humile	forest management activities
ursus arctos	exotic invasive	species survival	iucn
invasive plants	amphibian conservation	protected area management	conservation action
forest management plan	agrilus planipennis	extinction risks	troglydtes
forest regeneration	soil restoration	round goby	conservation outcomes
alien plants	chimpanzees (pan troglodytes)	invasive crayfish	local extinctions
non-native plant	pan troglodytes	illegal hunting	restoration programs
phytoextraction	brown bears	sustainable development indicator	endangered medicinal plant
threatened species.	rare and endangered	insect conservation	conservation outcome
plantation forest	invasive species management	biological invasions	conservation plans
alien plant	sustainable groundwater	soil and water conservation measures	conservation prioritization
selective logging	sustainable forest	species management	environmental conservation
forest plantations	in situ bioremediation	ecological restoration	agrilus planipennis fairmaire
invasive alien plant	poaching	invasive predator	exotic plant invasion
planted forest	endangered plant species	endangered species act	neogobius melanostomus
predator??prey model	wildlife management	brown bear (ursus arctos)	globally threatened
marine strategy framework directive	remediation potential	threatened bird	trichechus
sustainable forest management	predator??prey system	phytoremediation efficiency	integrated valuation
plantation forests	predator??prey interactions	reforestation	plant invader
phytoremediation potential	invasive plant	sustainable development strategies	bioremediation processes
habitat restoration	endangered species.	invasive pests	alien species
conservation forest	species conservation	acinonyx jubatus	restoration goal
invasive tree	invasion biology	prey interaction	afforestation
iucn criteria	environmental accounting	sustainable land	asian elephants (elephas maximus)
phytostabilization	weed optimization	panthera	troglydte
habitat management	plantation forestry	sustainable forestry	conservation implication
conservation target	conservation land	restoration success	canis lupus
invasive alien species	phytoremediation plant	federally endangered	soil conservation measure
ecosystem restoration	nonnative species	native invasive	rhinopithecus
phytoremediation	wolves (canis lupus)	sustainable groundwater management	bioremediation of soil
invasive population	ailuropoda	population viability analysis	conservation implications
forest plantation	near threatened	iucn red list criteria	conservation reserve
plant conservation	risk of extinction	forest management unit	conservation areas
predator-prey model	biodiversity protection	gorilla gorilla gorilla	habitat loss and fragmentation
introduced range	predator??prey	bioremediation potential	native plant species
emerald ash borer	invasive exotic	predator-prey systems	ecosystem assessment
predator-prey system	brown bear	landscape restoration	soil conservation measures
biodiversity conservation.	prey dynamics	conservation actions	exotic plants
forest management practice	lake management	extinction probability	desertification control
critically endangered species	cane toad	conservation planning	native species richness
elephas maximus	ecosystem recovery	water and soil conservation	iucn categories
international union for conservation of nature	wetland management	argentine ant	species extinctions
forest conservation	forest management strategies	introduced species	forest biodiversity
conservation targets	forest management plans	carnivore conservation	threatened plant species
species recovery	river regulation	critically endangered	wildlife conflict
panthera tigris	conservation priority	prey models	community forest management
invasive grass	invasion risk	non-native invasive	restoration goals
forest management practices	species extinction	reforestation program	predator-prey models
alien plant species	species of conservation concern	non-native plant species	restoration area
systematic conservation planning	ant invasion	habitats directive	threatened plants
invasive populations	invasive shrub	restoration efforts	phytoextraction potential
invasive insect	bioremediation process	sustainable development indicators	population declines
planted forests	agenda 2030	linepithema	biological invasion
propagule pressure	society for conservation biology	land desertification	invasive success
reducing emissions from deforestation	international union for conservation of nature (iucn)	biodiversity target	legal wildlife trade
invasive alien	ecological restoration projects	groundwater protection	management of protected areas
natural regeneration	iucn red list categories	lake restoration	soil conservation practice
natura 2000 network	invasive weeds	exotic pest	illegal wildlife trade
panthera pardus	land conservation	native biodiversity	priority conservation
invasibility	invasion ecology	new forest	invading species
forest protection	invasive range	protected areas (pas)	restoration practice
sustainable land use	wolf (canis lupus)	management strategy evaluation	threatened and endangered species
sustainable land management	high conservation value	dreissena polymorpha	extinction debt
prey model	oil bioremediation	threatened species	conservation unit
predator??prey interaction	enemy release	conservation value	effective conservation
threatened plant	valuation of ecosystem services	forest degradation	restoration measures
wildlife trade	invaded range	alien invasive species	agrilus
systematic conservation	wildlife conservation	endangered status	invasive alien species (ias)
conservation of biodiversity	rare and endangered species	large carnivore	threatened and endangered
alien invasive	convention on biological diversity	restoration projects	marine strategy framework directive (msfd)
ailuropoda melanoleuca	conservation of species	enhanced bioremediation	asian elephants
zebra mussel	biological conservation	acinonyx	aquatic invasive species
invasive species.	predator-prey interactions	forestry management	grizzly bear
flagship species	red list criteria	wildlife management.	restoration measure
phytoextract	predator-prey dynamics	data deficient	dreissena
deforestation and forest degradation	the convention on biological diversity	asian elephant	conservation importance
afforested	wetland conservation	invasive weed optimization (iwo)	aichi target
conservation status.	sustainable development strategy	restoration ecology	local extinction
natura 2000 site	endangered tree	aquatic invasive	biodiversity targets
habitat conservation	endangered plants	convention on international trade in endangered species	asian clam
soil and water conservation	predator-prey interaction	exotic plant	conservation status

Life on Land			
SDG 15			
umbrella species	invasive tree species	intensive forest management	conservation effectiveness
extinction rates	conservation tool	pan troglodytes verus	faunal extinction
community forest	camera-trap	conservation interest	conservation investment
desertification process	rare and endangered plant	habitat destruction	wild fauna
poachers	emerald ash borer (eab)	camera trap	wildlife conflicts
snub-nosed monkey	active restoration	economic valuation	msfd
convention on biological diversity (cbd)	bioremediation agent	total economic value	anaerobic bioremediation
soil conservation	conservation plan	degraded forest	native tree
invaded area	threats to biodiversity	biodiversity value	jaguar (panthera onca)
argentine ants	native and non-native species	natural restoration	lowland gorilla
soil conservation practices	pan troglodytes schweinfurthii	captive breeding program	panthera tigris altaica
zebra mussel (dreissena polymorpha)	restoration treatments	iucn conservation status	remediation plan
conservation breeding	endangered wildlife	conservation easement	forest patches
elephas	conservation assessments	bioremediation technology	degraded land
conservation units	plant invaders	freshwater management	native plants
conservation goals	phytoextraction efficiency	habitat suitability model	gray wolves
invasive grasses	camera trapping	modified landscape	restoration planting
invasive alien plant species	phytostabilisation	sustainable forest management (sfm)	restoration strategies
red list assessment	phytoremediation	forest use	primate conservation
conservation goal	u.s. endangered species act	landscape connectivity	livestock depredation
oil conservation	western lowland gorilla	conservation activities	private lands
giant panda	nonnative plant	forest ecosystem management	caiman latirostris
forest plant	conservation area	bioremediation system	wild chimpanzee
aerobic bioremediation	conservation policy	native ecosystem	priority conservation areas
assisted phytoremediation	native tree species	contingent valuation method	imperiled
nature conservation	extinction probabilities	biodiversity conservation	introduced predator
pongo pygmaeus	conservation of endangered species	habitat protection	human-modified
native and invasive species	illegal harvest	priority areas for conservation	degraded lands
human-wildlife conflict	invaded ecosystems	community-based conservation	human-modified landscape
population viability	ex situ conservation	native predators	forest landscapes
invasive fish	captive breeding	degraded ecosystems	exotic grass
wetland protection	extinction rate	lycaon	megafaunal extinction
area of occupancy	community forestry	dikergammarus villosus	contingent valuation method (cvm)
invasive ants	butterfly conservation	participatory forest management	native range
restoration and management	native plant communities	leopard (panthera pardus)	community conservation
endangered tree species	rhinella marina	wildlife forensic	priority species
deforestation and degradation	forest policy	exotic species invasion	conservation landscape
fauna & flora international	asian elephant (elephas maximus)	invasive insect pest	system restoration
exotic plant species	snub-nosed monkeys	epithem	crocodylus porosus
farmland protection	alien tree	rio 2016	heavy metal phytoremediation
at-risk species	protected forest	chrysocyon brachyurus	natura 2000 area
sustainable land-use	degraded ecosystem	introduced populations	forest owners
the giant panda	tapius	native ecosystems	conservation intervention
reintroductions	conservation reserve program	timber forest	forest managers
passive restoration	extent of occurrence	habitat connectivity	stages of invasion
tropical biology	conservation management	species habitat	population extinction
restoration practices	water conservation measures	non-timber	native invasive species
forest governance	conservation biology	conservation policies	exotic tree
endangered primate	international union for the conservation of nature	marxan	deforestation rates
acipenser transmontanus	listed species	imperiled species	social and environmental accounting
threat status	managed forests	modified landscapes	strategy frame
forest landscape restoration	invest model	invasive mammal	forest reserves
trophy hunting	chimpanzee (pan troglodytes)	ecosystem service valuation	wildlife crime
leopards	forest management regime	invasive fish species	mammal conservation
forest ecosystem service	logged forest	tree plantation	translocation factor (tf)
conservation decisions	native predator	dikergammarus	tropical forest restoration
human-wildlife	non-native fish	grain for green	joint forest management
reducing emissions from deforestation and forest degradation (redd+)	ecosystem conservation	urban forest management	saproxylc beetle
convention on international trade in endangered species of wild fauna and flora	invasive species control	fragmented landscapes	threatened taxa
agenda 21	non-timber forest products	community-based forest management	life management
soil phytoremediation	zebra mussels (dreissena polymorpha)	invasion history	endangered subspecies
forest loss	habitat degradation	globally threatened species	tapius terrestris
red-list	woodland caribou	conservation strategy	long-term conservation
ratio-dependent predator-prey	conservation threat	ecology and conservation	exotic invasive species
conservation objective	restoration plan	chrysocyon	community forests
neogobius	soil conservation service	management of invasive species	restoration target
water bioremediation	managed forest	round gobies	forest management regimes
conifer plantations	soil conservation service curve number	strategy framework	conservation easements
afforestation program	african wild dog	reforestation projects	forest fragmentation
enemy release hypothesis	threatened status	conservation reserve program (crp)	forest owner
species control	combat desertification	ecological restoration program	secondary forests
conservation initiatives	invaded communities	trichechus manatus latirostris	nonindigenous species
least concern	international union for conservation of nature (iucn) red list	diversity conservation	forest specialist
lycaon pictus	rhinopithecus roxellana	jaguars	vulnerable species
regional conservation	human-dominated landscapes	invasives	conservation benefits
acipenser sinensis	restoration planning	pardis	conservation function
recovery of vegetation	tree plantations	native fishes	millennium ecosystem assessment
camelus bactrianus	red-listed	human?wildlife	conservation efforts
conservation objectives	wildlife management area	invasive insects	bioremediation technique
climate finance	afforestation project	white sturgeon	nagoya protocol
restoration project	grassland restoration	forest remnant	restoration outcomes
restoration program	endangered animals	bushmeat hunting	biodiversity and ecosystem services
giant pandas	forest remnants	human-dominated	forest landscape
wolf population	predator?prey dynamics	land protection	invasive weed optimization algorithm
restoration activities	the giant panda (ailuropoda melanoleuca)	native and introduced ranges	drivers of deforestation
restoration actions	alien plant invasion	native forests	wildlife managers
metal phytoremediation	forest plan	charadrius melodus	avoided deforestation
ecological conservation	afforestation and reforestation	forest fragments	sustainable ecosystem management
threat to biodiversity	non-timber forest product	conservation practitioners	global biodiversity
rangifer tarandus caribou	diceros bicomis	saproxylc	forest patch
human-dominated landscape	freshwater biodiversity	camera traps	rare and threatened species
reforestation programs	conservation status assessment	pipng plover	extinction of species
invasive predators	production forest	in situ conservation	human?wildlife conflict
forest management system	invasive and native species	conservation benefit	habitat loss and degradation
endangered orchid	deforestation rate	introduced population	ecosystem services valuation
protected area network	priority conservation area	habitat loss	large-scale restoration
forest ecosystem services	pet trade	remediation efficiency	conservation genetics

Life on Land			
SDG 15			
phytoremediation technology	weed optimization algorithm	native and introduced species	
declining species	conservation resources	remnant populations	habitat suitability models
protected areas	restoration potential	land degradation and desertification	captive chimpanzees
alien invasive plant	diceros	invasive ant species	biodiversity decline
threatening processes	payments for ecosystem services	cheetahs	key habitat
forest cover change	spheniscus demersus	red list assessments	soil conservation service curve number (scs-cn)
desertification processes	puma concolor	habitat fragmentation	remediation of soil
camera-trapping	natural forests	diversity hotspots	exotic pests
restoration management	timber production	bird diversity	conservation genetic
protected forests	non-native tree	conservation gap	manatees
diversity and conservation	conservation challenges	conservation ecology	bonobos
grassland bird	species persistence	non-market valuation	restoration of vegetation
conservation practices	aichi biodiversity target	conservation practice	conservation success
colonization and extinction	biodiversity conservation planning	anthropogenic habitat	fragmented land
combating desertification	exotic species	wolves	critical habitat
local agenda 21	biodiversity hotspots	anti-poaching	ex-situ conservation
adaptive forest management	soil and water conservation (swc)	habitat fragment	bioremediation strategy
redds	exotic specie	agri-environment scheme	landscape conservation
freshwater conservation	intact forest	forest code	gray wolf (canis lupus)
wild chimpanzees	translocation factor	endangered bird species	enhanced phytoremediation
aichi targets	private forest	restored forest	suitability models
conservation perspective	native forest	invasive trees	remnant population
conservation interventions	species introductions	ntfp	contingent valuation
grizzly	fragmented landscape	threatened bird species	hyperaccumulator
the wildlife society	research and conservation	population viability analysis (pva)	global conservation
habitat requirements	conservation significance	red list status	novel ecosystem
restoration outcome	suitable habitats	invasive plant management	piping plovers
gorilla beringei	assisted phytoextraction	african wild dogs	scs-cn
stream restoration	remnant forest	restoration treatment	riparian forests
	convention on international trade in endangered species of wild fauna and flora (cites)	fragmented habitat	probability of extinction
federally threatened		habitat area	international conservation
metal phytoextraction	degraded habitat	cheetah (acinonyx jubatus)	biodiversity policy
beringei	captive chimpanzee	forest policies	bettongia
production forests	restored habitat	scaphirhynchus albus	forest management model
native trees	extinction dynamics	habitat suitability	illegal harvesting
western lowland gorillas	conservation strategies	benefit sharing	native fish
habitat requirement	forest sustainability	introduced plant	biodiversity indicator
riparian restoration	endemic bird	grassland birds	management and conservation
conservation and restoration	iucn red list assessment	species introduction	habitat alteration
conservation effort	conservation organization	occupancy model	holling type
reintroduction program	soil and water conservation practices	predator control	predator-prey
spatial conservation	habitat patches	integrated valuation of ecosystem services and tradeoffs (invest)	service valuation
native fauna		fragmented forest	sustainable harvest
threatening process	conservation needs	priority habitat	agri-environment schemes
cites appendix i	iucn category	human-wildlife conflicts	conservation and development
ecological remediation	endangered species	environmental bioremediation	control of invasive species
conservation of threatened species	conservation organizations	restoration plantings	endangered species act (esa)
threatened birds	endangered specie	ecological corridor	biodiversity loss
degraded forests	african penguin	chinese sturgeon	fish conservation
connectivity conservation	mangrove restoration	in-situ bioremediation	native crayfish
species restoration	introduced predators	suitability model	podocnemis
potential habitat	invasive exotic species	black rhino	land birds
ycao	forest planning	restoration of degraded land	habitat patch
saproxlytic beetles	bioremediation efficiency	endemic and threatened species	avian conservation
forest management and conservation	ecosystem services (ess)	restoration targets	conservation and management strategies
human-modified landscapes	wild dog	lowland gorillas	bettong
crocodylus	habitat network		ecological corridors
