

Partnerships for the Goals			
SDG 17			
ppp project	china's manufacturing	economic corridor	loess plateau in china
ppp projects	2030 agenda	yangtze river delta (yrd)	urbanization rate
developing country context	subtropical china	georgia institute of technology	wealth quintile
public??private partnership	middle-income countries (imics)	access to electricity	tax policy
public-private partnership (ppp)	monetary policies	informal sectors	farm household
small island developing state	public partnership	sustainable development goals (sdg)	congo red dye
south china university of technology	china universities	southeast china	smallholder agriculture
china climate	low and middle-income countries	northwestern china	smallholder farming systems
small island developing states	international cooperation	lower-middle-income	coastal provinces
public private partnership	2030 agenda for sustainable development	low- and middle-income countries (lmic)	official development assistance (oda)
north china plain (ncp)	radium equivalent	low-income country	reform and opening
developing country	agenda for sustainable development	carbon emission intensity	universities in china
economic growth in china	divisia index	chinese province	different regions of china
public??private partnerships	low and middle income countries	deforestation and forest degradation	fdi inflows
developing states	middle-income country	outward foreign direct investment	corporate taxation
belt and road initiative	china's economic growth	transfer pricing	developing nations
belt and road initiative (bri)	skilled birth	lower-middle-income countries	trade openness
informal economy	public??private partnership (ppp)	autoregressive distributed lag	built-up land
the north china plain (ncp)	livelihood activities	monetary policy transmission	yangtze river delta
the belt and road initiative	lmdi	china development	reducing emissions from deforestation and forest degradation
developing state	the 2030 agenda	logarithmic mean divisia index (lmdi)	public-private-partnership
provincial panel data	the china health and nutrition survey	yangtze river delta, china	household livelihood
loess plateau, china	provinces in china	agriculture in china	coupling coordination degree
cross-border cooperation	value-added tax	northern south china sea	antenatal care (anc)
loess plateau of china	policy shocks	china??s economy	state grid corporation of china
the north china plain	chinese provinces	lulc changes	east of china
monetary policy rule	farming households	developed and developing countries	sustainability policies
public-private partnerships	development assistance	agenda 2030	skilled birth attendance
china energy	groundwater potential	tax systems	emerging economy
the belt and road	china coal	private partnership	millennium development goals
public private	policy shock	groundwater potential zones	arid region of northwest china
the loess plateau of china	emerging country	divisia	the environmental kuznets curve
road initiative	older farmers	middle east and north africa (mena)	cross-border collaboration
informal employment	unfcc	africa region	provincial-level
urbanization in china	the china health and retirement longitudinal study	green development	potential zones
formal economy	farming household	spatial durbin	monetary policy regime
border cooperation	brics countries	stirpat model	chinese investment
north china plain	formal employment	external hazard index	haze pollution
china's economy	carbon tax policy	the brics	debt sustainability
the informal economy	sdg 1	china institute of atomic energy	extension services
belt and road	rural livelihoods	gulf of mexico (gom)	endogenous switching regression
spatial spillover effect	low and middle-income	south china sea (scs)	clean development mechanism (cdm)
the sustainable development goals (sdgs)	unfcc	conventional monetary policy	a low-income country
public private partnerships	sustainable development goals (sdgs)	fiscal policy	united nations framework convention on climate change
anti-money laundering	taylor rule	nanjing, china	northern ethiopia
monetary policy rules	high-quality development	department for international development	rural south africa
economic development in china	or in developing countries	china region	inner mongolia, china
tax policies	regional sustainable development	policy transmission	urban china
mozambique channel	sdg indicator	low-carbon development	ekc hypothesis
prefecture-level cities	rural livelihood	imics	potential source contribution
the informal sector	sustainable development policy	tax administration	green technology innovation
livelihood diversification	tropical china	ardl bound	the chinese economy
congo red (cr)	autoregressive distributed lag (ardl)	underground economy	tax moral
low- and middle-income countries (imics)	development aid	low income countries	congo basin
public-private partnerships (ppps)	developing economy	corporate tax avoidance	china spallation neutron source
china's economic development	the shadow economy	the yangtze river delta	high-quality economic development
excise tax	spatial spillover	small-scale farmers	environmental kuznets
low-income and middle-income countries	smallholder farm	grain for green	anti-money laundering (aml)
the belt and road initiative (bri)	public private partnership (ppp)	japan international cooperation agency	ecological civilization
money laundering	un sustainable development goal	farm households	birth attendance
tax avoidance	unfc	232th and 40k	environmental kuznets curve
the sdgs	least developed countries	ict4d	us monetary policy
private partnerships	formal sector	unconventional monetary policy	agricultural expansion
public??private	country context	china health and retirement longitudinal study (char)	income country
shadow economy	case study in china	revenue collection	magmatic activities
monetary policy shock	the sustainable development goals	skilled birth attendant	chinese economy
small island developing states (sids)	value added tax	fdi inflow	japan international cooperation agency (jica)
smallholder farming	economic development level	india meteorological department	pearl river delta (prd)
tax evasion	public partner	rapid economic development	agro-ecological zone
optimal monetary policy	smallholders	west of china	developed and developing world
fiscal policies	middle income countries	air pollution in china	china family panel studies
low-and middle-income countries	effects of monetary policy	mann??kendall	recipient countries
informal sector	ssa countries	application in china	focus group discussions (fgds)
official development assistance	low and middle income	local livelihood	african economies
corporate tax	radium equivalent activity	the northern south china sea	potential source contribution function
innovation in china	excise taxes	inflation target	china railway
smallholder farmers	demographic and health surveys	pro-poor	millennium development goal
china health	sustainable livelihoods	international tax	sustainable intensification
public-private partnership	inflation targeting	research in india	northwest china
logarithmic mean divisia index	electricity access	reducing emissions from deforestation	human resources for health
china health and nutrition survey	sustainable livelihood	smallholder farming system	the inner mongolia
green total factor productivity	un sustainable development goals	southeastern china	rural ethiopia
smallholder farmer	groundwater potential zone	bounds test	forest degradation
low-and middle-income	developing country perspective	private partner	sub-sahara africa
united nations framework convention on climate change (unfcc)	spatial durbin model	small-scale farmer	mission in china
china economic growth	redd+	the millennium development goals	education in china
china health and retirement longitudinal study	tax system	northeastern china	potential zone
monetary policy	livelihood strategies	the south china sea (scs)	local livelihoods
tax policy	durbin model	environmental kuznets curve (ekc)	farm house
sub-saharan africa (ssa)	study in china	sustainable development in china	lao pdr
development cooperation	spatial spillover effects	emerging and developing countries	nationally determined contribution
sustainable development goal (sdg)	south africa (sa)	outward foreign direct investment (ofdi)	institutional delivery
foreign aid	the 2030 agenda for sustainable development	xinjiang, china	clean development mechanism
sustainable development policies	smallholder farms	rural china	systems strengthening
monetary policy shocks	is in developing countries	sub-saharan african countries	millennium development
united nations sustainable development goals	lulc change	land expansion	china and the united states
emerging countries	a-share	coupling coordination	bri countries

Partnerships for the Goals			
SDG 17			
sdgs	latin america and the caribbean	india meteorological department (imd)	national family health survey
developing-country	southwestern china	medical male circumcision	panel threshold
sustainability policy	poor countries	ecological protection	hebei region
tax compliance	health systems strengthening	ecologically fragile	poor households
rural households	the pearl river delta	partnership projects	middle income
lower-income countries	international developments	the middle east and north africa	provincial level
universal health coverage	nutrition transition	bounds testing approach	developing countries in asia
rapid economic growth	rural household	the brics countries	arid northwest china
middle income country	psm-did	green finance	the united states and china
energy consumption structure	health system strengthening	fiscal and monetary policy	hiv services
maternal and newborn health	lower-middle income	low-income and middle-income countries (lmics)	green innovation
universal health coverage (uhc)	low-income settings	hygiene (wash)	summer maize
potential ecological risk index	developing and emerging countries	least developed	low- and middle-income countries
rural bangladesh	aid effectiveness	non-state-owned enterprises	nutrition-sensitive
tax law	sustainable development agenda	monetary and fiscal policies	state-owned enterprises (soes)
fcc	land use and land cover change	modern contraceptive	antenatal care visit
land use/cover change	crustal growth	inner mongolia autonomous region	microcredit
northern ghana	ardl approach	poor farmer	livelihood strategy
china coast	sustainable agricultural development	young child feeding	after china
health financing	green total factor productivity (gtfp)	demographic health survey	income-generating
cultural expansion	chinese cities	demographic and health survey	artisanal and small-scale mining
monetary transmission	ecosystem service value	business tax	highlands of ethiopia
off-farm income	southern ethiopia	tertiary industry	republic of serbia
bounds testing	policy suggestion	urban expansion	province-level
coast of china	public-private partnerships (ppp)	and sub-saharan africa	it in china
resource-poor countries	developing nation	tectonic activities	central china
secondary industry	rural nepal	public-private partnership projects	dhaka, bangladesh
sustainable land management	sustainable policies	development agenda	the republic of serbia
low-income setting	system strengthening	multi-regional input-output	lower-middle income countries
public-private partnership project	spring maize	maternal health services	reducing poverty
clean development	georgia tech	infant and young child feeding	central argentina
wealth index	sdg 6	height-for-age z-score	land use/land cover (lulc)
kuznets curve	northern gulf of mexico	child undernutrition	poor household
guangzhou, china	policy rule	bangladesh demographic and health survey	children in china
tax morale	international development	deforestation rate	rural house
ecological risk index	industrial structure upgrading	height-for-age	china fir
china's urbanization	demographic and health survey data	china spallation neutron source (csns)	expansionary monetary policy
formal and informal sector	fgds	cooking fuel	cdm projects
economic belt	the loess plateau	off-farm	facility-based
united states agency for international development	sustainable urbanization	developing cities	china study
the coupling coordination	sichuan province, china	and hygiene (wash)	multiple indicator cluster survey
unidirectional causality	rural revitalization	skilled birth attendants	food and nutrition security
urban sustainable development	ardl bounds test	united states and china	newborn health
reform and opening up	rural india	rural areas of china	pollution haven
middle east and north africa (mena) region	rice farmers	solar home system	rural ghana
research in brazil	international cooperation	climate change in china	arid regions of china
sdg targets	east asian summer monsoon	china and india	national cooperation
jordan university of science and technology	policy rate	cdm project	coastal areas of china
sustainable economic growth	china national knowledge infrastructure	farm activities	pmtc
small-scale farm	and developing countries	the yrd	southwest china
low-and middle-income countries (lmics)	framework convention on climate change	cookstoves	green economic
china's provinces	the pearl river delta (prd)	system generalized method of moments	the east asian summer monsoon
income diversification	farming experience	maize yields	household welfare
consumption structure	non-timber forest products	sustainable development indicator	kumasi
structural decomposition analysis	income-generating activities	and foreign direct investment	voluntary medical male circumcision
low- and middle-income country	private-public partnership	soil fertility management	the yangtze river delta region
small-scale mining	non-timber forest product	maxent model	india and china
china research	conditional cash transfer	mann?kendall test	demographic surveillance
research in developing countries	system generalized method of moment	informal workers	small-scale gold mining
northwest of china	rhyzopertha dominica	guinea pig model	female sex workers (fsws)
policy sustainability	maternal health service	northeast of china	latin america and the caribbean (lac)
ardl bounds	inter-provincial	effectiveness of monetary policy	smallholder dairy
rural electrification	emergency obstetric	resource-based cities	child stunting
central and western china	ecological security	pilot cities	government of india
china experience	alternative livelihood	coordination degree	south of china
lithuania	middle east and north africa	conservation agriculture (ca)	sovereign default
prevalence of stunting	shanghai, china	income generation	informal economies
access to credit	modern contraceptive use	informal worker	fmols
a-share listed companies	land use land cover	performance-based financing	debt structure
potential ecological risk	developing regions	south china sea.	access to market
rural uganda	rice farmer	endogenous switching	lulc
global sustainable development	rhyzopertha	sustainable urban development	2030 sustainable development goals
monetary and fiscal policy	public partnerships	china and the usa	china city
beijing-tianjin-hebei	community forest	stochastic impacts by regression on population	northwest ethiopia
sustainable economic development	pearl river delta	nutrition security	developing economies
cape town, south africa	low-middle income	cookstove	brics economies
china's coast	the northeast china	expanded program on immunization	made in china
rural tanzania	facility delivery	household survey data	length-for-age
emergency obstetric care	huang-huai-hai	yield gaps	health extension
pmtct	mekong delta, vietnam	sbm model	standardized precipitation evapotranspiration index
public?private partnerships (ppps)	environmental kuznets curve (ekc) hypothesis	sustainable land	wealth status
sustainable land use	the panel data	the chinese government	nw china
low-income countries	yield gap	sub saharan africa	dar es salaam, tanzania
china earthquake	education in developing countries	rural kenya	western cape province
agro-ecological zones	universiti putra malaysia	southern chile	fdi in china
policy suggestions	poor farmers	chinese firm	crop diversification
guinea grass	sustainable development (sd)	poverty reduction	catastrophic health expenditure
central chile	community forestry	northeast china	kampala, uganda
farmers? perception	national food security	east china sea (ecs)	timber forest
corporate tax rate	pataagonia, argentina	global civil society	sumatra, indonesia
sdg indicators	chinese firms	low-middle income countries	corporate taxes
dietary diversity	healthy china	industrial upgrading	middle east and north africa region
china education	se china	statistical yearbook	china's manufacturing industry
land use/land cover change	lean development	africa countries	sustainable rural development
spatial agglomeration	regions of russia	low and middle-income countries (lmics)	demographic health
reform in china	yangtze river delta region	zero hunger	poverty alleviation
millennium development goals (mdgs)	resource endowment	fully modified ordinary least square	china trade
